

HEALTH, SAFETY & EVERYDAY STUDENT LIFE

Campus wellness. Ready when students need it.

Established on campuses.
Expanding nationwide.

Illustrative campus engagement

No cost to the university. Fully managed by MediCube.

MediCube brings stocked wellness kiosks, ongoing operations and student engagement together in one campus service. We work with university communities to keep essentials within reach and make student needs part of the program.

Access that fits student life.

Residence halls, common areas and gyms bring essentials into daily routines, with 24-hour access at approved campus locations.

We manage the service.

MediCube supplies the kiosks and products, restocks, maintains the system and coordinates fulfillment. No added campus staffing burden.

Student voices shape the program.

Product requests, surveys, reviews, QR pathways and campus initiative leaders connect student participation with ongoing feedback.

ESSENTIAL PRODUCTS. RESPONSIVE CAMPUS PROGRAMS.

Women's health and emergency contraception • OTC medicines • Hygiene • COVID testing products

Optional campus programs include overdose awareness, Narcan access, HIV/AIDS awareness, food and student vouchers, and education around campus health requirements. Program scope is shaped with university partners.

BUILT TO RESPOND AS STUDENT NEEDS CHANGE

Utilization tracking and recurring student feedback guide product selection and education. Monthly, quarterly, seasonal and annual initiatives keep campus priorities connected to an ongoing service.

Your campus. Your priorities. Let's talk.

Share what students need. Connect for a brief introduction and demonstration.
